**INTRODUCTION:**

These coders are ideal for **On-Line High Speed Coding** on packaging machines or bottles moving on conveyor or Winder / Rewinder systems.

The message to be printed is very easily composed on its graphic display using the integrated complete **QWERTY keyboard**. The message can be upto 4 lines with a combination of small, medium or large characters from 1 mm to 18 mm in height along with LOGOS.

The Inking system consists of a simple **disposable pre-mix ink cartridge** using fast drying & indelible solvent-based inks (for porous and non-porous surfaces) which are just push fitted into its slot & immediately you can start printing.

The small print head is then placed aligned with the object or substrate & whenever the product sensor gives a signal, the whole message is spray-printed onto the substrate while it is in motion without touching it.

**FEATURES:**

- Stainless steel rugged construction.** All machine stands, product sensor with stand, print head stand included with the system. Connection to print head via 1 m flexible cable. The print module is well protected & insulated in the Stainless steel tubular print head.
- Graphic 128 X 64 backlit liquid crystal display & integrated QWERTY keyboard with Real time clock and calendar, expiry date, Bar Codes, LOGOS, serial nos. (Counter), with 9 levels of Boldersisation, message reverse or invert print & storage of 45 messages of 4 lines each of 120 characters per line with facility for password lock.
- This printer is Fully Electronic without CORE System & does not have any air pump, viscosity control unit, filters, etc. & so there is no maintenance required (No AMC). It does not require separate Make-Up or Wash Solution as everything is included in the disposable ink cartridges making it very user friendly for the Operator. The running / printing cost is only about 2 paise per impression (25 characters).**
